DATE

October 2026

1. Navigation Architecture & Entry Routing

Gymholik utilizes Expo Router v4 with a hybrid stack-and-tab navigation hierarchy. User entry begins at `root_layout.tsx`, inspecting the Zustand authentication state before routing.

```
[App Launch] | +---> [Auth Check: useAuthStore] | +---> Unauthenticated? → Replace to /(auth)/login
| | | +---> Tap 5x on Logo → /(auth)/super-admin-login | +---> Register Gym → /(auth)/register
(Owner) | +---> Register Trainer → /(auth)/register (Trainer) | +---> Authenticated? | +---> Role =
OWNER / STAFF → /(tabs) (Home Dashboard) | +---> Role = TRAINER → /(tabs)/members (My Members)
```

2. Role-Based Tab Configuration Matrix (tabsByRole)

The single source of truth `mobile/src/navigation/tabsByRole.ts` defines tab ordering, visibility, and redirection targets:

Role	Allowed Tabs (Exact Order)	Landing Route	Forbidden Routes (Guarded & Hidden)
OWNER	1. Home • 2. Members • 3. Check-in (Center) • 4. Payments • 5. More	/(tabs)	notes, profile
STAFF	1. Home • 2. Members • 3. Check-in (Center) • 4. Payments • 5. More	/(tabs)	notes, profile
TRAINER	1. My Members • 2. Check-in (Center) • 3. Notes • 4. Profile	/(tabs)/members	index (Home money), payments, more, staff, plans, settings, subscription

3. Detailed User Journeys

3.1 Journey 1: Gym Owner Complete Operational Cycle

- Launch & Login:** Enters phone, password, and gym code. System verifies OWNER role and lands on Dashboard.
- Financial Audit:** Views Monthly Collection, Today Collection, and Outstanding Dues. Reviews 7-day trend bar graph.
- Staff & Plan Configuration:**
 - Navigates to More > Plans → Creates "3 Month Gold" with admission fee and duration.
 - Navigates to More > Staff → Adds front-desk staff phone and password.
 - Navigates to More > Trainers → Reviews pending trainer applications and approves with trainer specializations.

4. **Member Admission:** Taps Members tab → Taps + Add Member → Uploads photo, selects plan, enters initial payment, confirms receipt.

3.2 Journey 2: Front-Desk Staff Check-In & Fee Collection

1. Member Check-in:

- Staff taps center raised **Check-in** button.
- Searches member by name or phone. Debounced list surfaces member profile.
- Taps check-in → System validates membership status.
- If expired: Modal alert offers instant renewal. If active: Green sage pulse confirms check-in.

2. Dues Collection:

- Staff navigates to Payments > Dues.
- Selects member with balance → Enters collected amount (CASH / UPI) → Submits payment → Generates digital PDF receipt.

3.3 Journey 3: Personal Trainer Client Progression Workflow

1. **Landing:** Trainer logs in → Automatically lands on **My Members** tab (zero access to financial dashboard).
2. **Client Oversight:** Views only members assigned to their roster. Selects member to view training bio.
3. **Progress Notes & Weight Tracking:**
 - Taps **Notes** tab → Selects client chip avatar.
 - Views chronological history (Workout, Diet, Progress, Weight logs).
 - Taps Floating Action Button (FAB) + Add Note → Enters current weight and workout adjustments → Saves note.
 - Weight Progress chart dynamically updates point trajectory.
4. **Account Management:** Taps **Profile** tab → Views trainer specializations, gym affiliation, Change Password, and Sign Out.

4. Error & Edge Case Handling Flows

Deep-Link Interception Rule

If a Trainer clicks a deep link targeting `/(tabs)/payments` or `/(tabs)/more`, the layout guard immediately intercepts the route and executes `router.replace('/(tabs)/members')` before any UI renders.
