

UI/UX Design Brief

Forest Iron design system, components, motion and screen specifications

Brand direction, colour and type tokens, component specs, motion rules, wireframes for all key screens, role-based UI differences, microcopy and accessibility. Use this as the single reference when prompting an AI IDE or designing in Figma.

1. Design Vision

Gymholik should feel like a premium fitness product, not an accounting sheet. The look is **Forest Iron**: deep forest greens, soft mint text, glass-like cards over a dark gym photograph. It is calm, strong and trustworthy. Owners should be proud to show it to members and staff.

1.1 Design principles

- Fast first.** The most frequent jobs (check-in, collect fee, add member) take the fewest taps and the biggest targets.
- Clear hierarchy.** One primary action per screen, in sage. Numbers are big, labels are small and quiet.
- Calm, not noisy.** One accent colour family. Status colours (amber, coral) are used only for meaning.
- Premium with restraint.** Glass, glow and motion are used to guide attention, never to decorate every element.
- Readable everywhere.** Dark theme with high contrast, large text, works in a bright gym lobby and on cheap Android screens.
- Role-aware.** Each role sees only what it needs. Hidden things are not shown disabled.
- Plain language.** Short English labels. No jargon, no Hinglish in the UI.

1.2 Brand personality and voice

Trait	Meaning in the UI
Strong	Bold headings, solid buttons, confident numbers
Trustworthy	Clear money formatting, receipts, no surprises, clear errors
Friendly	Greeting by name, encouraging empty states, short helpful text
Modern	Glass surfaces, smooth transitions, haptics

Tagline: **Manage your gym, all in one place.** App name: **Gymholik** (working name).

2. Colour System

Palette taken from the chosen reference (green capsule swatches). Dark theme only for the MVP. A light theme is a Phase 2 item (sunlight readability) and should be mapped from these same tokens.

Swatch	Token	Hex	Used for
	bg / deepest	#051F20	Screen background, text on sage buttons
	surface / card	#0B2B26	Cards, tab bar (solid), sheets
	raised	#163832	Inputs, chips, raised cards, table headers
	border / accent-dark	#235347	Borders, selected backgrounds, glow
	primary / sage	#8EB69B	Primary buttons, active icons, links, focus ring
	mint / light	#DAF1DE	Headings, big numbers, active tab, text on dark
	warning	#F5B544	Expiring soon, caution banners
	danger	#FF6B6B	Dues, expired, errors, destructive actions

2.1 Text colours

Role	Value	Notes
Primary text	#DAF1DE	Headings, values
Secondary text	rgba(218,241,222,0.65)	Labels, helper text. About #92AC9E on card
Inactive icon and tab	rgba(218,241,222,0.55)	About #7D988B on card
Text on sage button	#051F20	Never white on sage
Placeholder	rgba(218,241,222,0.45)	Do not use for essential information
Cursor and selection	#8EB69B	Set on every input (default iOS blue clashes with the theme)

2.2 Contrast check (WCAG)

Pair	Ratio	Result
Mint #DAF1DE on bg #051F20	14.4 : 1	AAA
Mint on card #0B2B26	12.7 : 1	AAA
Sage #8EB69B on bg	7.6 : 1	AAA (normal text)
Sage on card	6.7 : 1	AA
Dark #051F20 on sage button	7.6 : 1	AAA
Amber #F5B544 on card	8.3 : 1	AAA
Coral #FF6B6B on card	5.5 : 1	AA
Secondary text (65 percent mint) on card	6.2 : 1	AA
Inactive tab (55 percent mint) on card	4.9 : 1	AA (just). Do not go lower
Border #235347 on bg	2.0 : 1	Decorative only. Never the only way to show state

2.3 Gradients and glow

- Primary button gradient: #8EB69B to #DAF1DE, left to right, low difference so text stays readable.
- Hero card glow: radial gradient from rgba(142,182,155,0.18) at the top left fading to transparent.
- Background image overlay: vertical gradient, rgba(5,31,32,0.90) at the top 0 to 120 px (so the status bar is readable), then 0.70, ending at 0.95 near the bottom.
- Focus glow on inputs: 1.5 px sage border and 8 px soft shadow in rgba(142,182,155,0.35).

3. Typography

Style	Font	Size / line	Weight	Use
Display	Space Grotesk	32 / 38	Bold	Hero number (today's collection), splash name
Title	Space Grotesk	24 / 30	Bold	Screen titles, greeting
Subtitle	Space Grotesk	18 / 24	SemiBold	Section and card titles
Number	Space Grotesk	26 / 30	Bold	Stat card values
Body	Inter	15 / 22	Regular	Default text
Body strong	Inter	15 / 22	SemiBold	Names, emphasised values
Caption	Inter	12 / 16	Regular	Helper, timestamps
Overline	Inter	11 / 14	SemiBold, uppercase, 1.2 letter spacing	Section labels (QUICK ACTIONS)

Style	Font	Size / line	Weight	Use
Button	Space Grotesk	16 / 20	SemiBold	Buttons
Tab label	Inter	11 / 14	Medium	Tab bar (never below 11)

- Load fonts with expo-font (@expo-google-fonts/space-grotesk and @expo-google-fonts/inter). Keep the splash screen visible until fonts are ready.
- Respect the user's system text scale up to 130 percent; cards must grow, not clip.
- Greeting uses one line with ellipsis. Never overlap the status bar.

4. Layout, Spacing and Shape

Token	Values
Spacing scale	4, 8, 12, 16, 20, 24, 32, 40
Screen horizontal padding	20 (cards 16 inside)
Radius	Input 16 to 20, button pill (999), card 24, chip 999, avatar 999, sheet 28 top corners, tab bar 32
Border	1 px rgba(218,241,222,0.12) on glass cards; 1.5 px accent on focus
Elevation	Shadow only on the tab bar and floating button (black, 35 percent, blur 16, offset y 8). Cards use border not shadow
Icon size	22 in tabs and rows, 18 inline, 26 in the centre button
Minimum touch target	44 x 44 (centre check-in button 60)

4.1 Safe areas and scroll padding (critical)

1. Every screen is wrapped in one shared Screen component.
2. Top padding = top safe-area inset + 12. Content must never sit under the status bar or Dynamic Island.
3. The background (photo, overlay or solid colour) extends under the status bar and the home indicator. There is no plain strip anywhere.
4. Scrollable content bottom padding = bottom inset + tab bar height (64) + 40, so the last card is fully visible above the floating bar.
5. Keyboard: KeyboardAvoidingView plus ScrollView on every form; the focused field scrolls into view.

5. Background Imagery

Item	Spec
File	assets/images/bg-gym.webp, 1080 x 1620 portrait, about 150 KB. Dark gym wall with barbell racks and lime accent lines (Unsplash, Ambitious Studio / Rick Barrett)
Use only on	Splash, Login, Register, Home header/hero area. Other screens use plain #051F20 for performance and readability
Fit	resizeMode cover, aligned to top
Overlay	Always apply the green gradient overlay (section 2.3). The lime lines should become a faint green tint
Branding	Brand logos visible in the photo (equipment makers) must be hidden by the overlay or cropped before store release
Licence	Keep the photographer credit in the About screen. Replace with an own photoshoot later for a unique brand look

6. Component Specifications

6.1 Buttons

Variant	Look	States
Primary	Pill, sage gradient fill, dark text #051F20, height 52, full width in forms	Pressed: scale 0.97 plus light haptic. Loading: spinner replaces label, disabled. Disabled: 40 percent opacity
Secondary	Pill, transparent, 1.5 px sage border, mint text	Pressed: raised background
Ghost	Text only in sage	Pressed: 70 percent opacity
Destructive	Coral text or coral outline; confirmation dialog required	-
Floating action	56 circle sage with dark icon, bottom right above tab bar (lists only)	Entrance scale-in

6.2 Inputs

- Label above the field (not placeholder-only) in secondary text, 12 px. Field height 56, radius 18, fill #163832, border #235347.
- Focus: border sage 1.5 px with soft glow. Error: border coral, message under the field in coral with an icon.
- Mobile input shows a fixed +91 prefix, phone-pad keyboard, max 10 digits, grouped as 98765 43210 while typing. Helper "This number will be your login ID" on Register.
- Password input has a show and hide eye (44 px target) and 16 px inner padding. Live rules list on Register with circles that fill when met.
- Return key: Next moves to the next field, Done submits on the last field.
- Cursor and selection colour #8EB69B.

6.3 Cards and surfaces

- GlassCard: fill #0B2B26 at 70 percent, 1 px border rgba(218,241,222,0.12), radius 24, padding 16. Blur is optional and disabled on low-end Android (use solid #0B2B26 at 92 percent).
- Stat card: icon in a 40 px rounded tile (distinct icon per metric), label in caption, value in Number style, arrow icon at the top right meaning tappable.
- Hero card: gradient glow, big count-up number, month chip, 7 small bars.

6.4 Badges, chips and status

Element	Spec
Status badge	Pill with dot. Active = sage, Expiring (5 days or fewer) = amber, Expired = coral, Pending = amber outline, Inactive = grey-green
Due tag	Small coral pill "Due ₹500"
Filter chip	Height 36, pill. Selected = sage fill with dark text. Unselected = #163832 with mint text. Row scrolls horizontally with a fade on the right edge
Role badge	Outlined pill (OWNER, STAFF, TRAINER)
Trainer type chip	Small pill in accent-dark with mint text

6.5 Avatar with status ring

Circle 44 px (56 on cards, 96 on detail). Photo or initials on #163832. A 2 px ring shows status colour: sage active, amber expiring, coral expired.

6.6 Floating tab bar (critical component)

Property	Spec
Shape	Floating pill, height 64, radius 32, 16 px side margins, floats 8 px above the bottom safe area
Background	Solid #0B2B26 (fully opaque). Content must never show through. Border rgba(218,241,222,0.14), shadow as in section 4
Tabs (Owner, Staff)	Home, Members, [Check-in], Payments, More. Five items
Tabs (Trainer)	My Members, [Check-in], Notes, Profile. Four items
Centre button	Raised 60 px sage circle with dark check-calendar icon, sitting 30 px above the bar edge with a 5 px ring in the screen background colour. No text label, no square highlight behind it
Other items	Icon 22 plus label 11 px. Active: mint with a small sage dot below. Inactive: 55 percent mint. Equal spacing, no truncation
Motion	Icon scale 1.0 to 1.1 on select, dot slides, light haptic on press
Source of tabs	One config file by role. Never render tabs a role is not allowed to use

6.7 Other components

Component	Spec
Segmented control	Pill track #163832, selected segment sage with dark text, sliding animation 200 ms. Used for Owner or Trainer and Cash, UPI, Card
Bottom sheet	Radius 28 top, drag handle, dim backdrop. Used for Forgot password info, approve trainer, confirm dialogs on mobile
Toast	Top, glass pill, auto-dismiss 3 s. Success sage icon, error coral icon
Skeleton	Rounded blocks #163832 with a moving highlight (1.2 s). Match the final layout
Empty state	Simple line illustration or icon in a circle, one-line message, one primary button. Notes uses a notebook icon, Members uses a people icon
Error state	Icon, short message, Retry button
Progress ring	Days left on Member detail and check-ins vs active on Home. Sage progress on #235347 track
Bars chart	7 vertical bars, sage, rounded tops. Zero values show faint baseline stubs and one caption
Banner	Full width glass strip with icon. Info sage, warning amber (subscription ending), error coral
Offline bar	Coral thin bar at top "No internet connection"

7. Motion and Haptics

Where	Animation	Duration / easing
App open	Logo fade and scale 0.9 to 1	500 ms ease-out
Login card	Slide up from the bottom, fade in	400 ms spring
Login error	Horizontal shake of the card	300 ms
Dashboard numbers	Count-up from 0 to value	800 ms ease-out
Cards entering	Stagger: each card rises 12 px and fades in with 60 ms delay	300 ms
Press	Scale to 0.97 plus selection haptic	100 ms
Tab change	Icon scale, dot slides, content cross-fade	200 ms

Where	Animation	Duration / easing
Check-in success	Sage pulse ring from the member avatar, checkmark draw, success haptic	600 ms
Expiring dot	Soft pulse on amber dot only	1.6 s loop
Loading	Skeleton shimmer	1.2 s loop
Screen transitions	Fade and 12 px slide	220 ms

- Use react-native-reanimated worklets (UI thread). No layout animations on long lists.
- Respect the system Reduce Motion setting: replace motion with simple fades or none.
- Maximum two simultaneous animations on a screen. Test on a low-end Android phone and report frames dropped.
- Haptics: light on taps, success on check-in and payment, warning on destructive confirmations.

8. Iconography

- One icon family only (Feather or Lucide style outline icons), stroke about 1.75, size 22.
- Distinct meaning per icon: Active members (users), Check-ins (calendar-check), New (trending-up), Expiring (clock, amber), Outstanding (wallet or alert, coral), Collect fee (credit-card), Add member (user-plus), Scan QR (qr-code), Dues (alert-triangle), Notes (edit), Trainers (dumbbell).
- Never use the same icon for two different cards.

9. Screen Wireframes

Low-fidelity layouts in the Forest Iron look. They show structure and hierarchy, not final pixel design. Wireframes are 156 pt wide to fit three per row.

10. Screen-level Specifications

10.1 Login

- Full-screen background photo with overlay, logo (transparent mint version, no checkerboard) in a 72 px rounded tile, name Gymholik, tagline.
- Glass card slides up with two labelled fields (Mobile number, Password), error banner above the button, Sign In primary button, Forgot password link (bottom sheet), Create an account link.
- Hidden gesture: tap the logo 5 times to reach Super Admin login.
- On error the card shakes, the banner shows a specific message (see App Flow, section 4.3).

10.2 Register

- Back button, selector "I am a..." (Gym Owner | Trainer) at the very top.
- Owner: Gym name, Your name, Mobile number, Password, Confirm password, Terms checkbox, Start free trial.
- Trainer: Gym code (with live "Joining: name"), Your name, Mobile, Password, Confirm, Terms, Start. No trial text.
- No City field. No separate Gym phone field.
- The form card must scroll fully; the button is never clipped by the card or tab area.

10.3 Home (Owner)

Block	Spec
Header	Greeting (time-based) with user name on one line, gym name below in mint 80 percent, notification bell 44 px. Safe-area aware
Hero card	Overline TODAY'S COLLECTION, count-up amount, month chip, divider, "Last 7 days" bars and a single caption when empty
Quick actions	Four tiles: Add Member, Collect Fee, Dues, Scan QR (Check-in is the centre tab, not duplicated)
Overview	2-column grid of five stat cards plus a full-width Total Outstanding card with View Dues button (coral)
Expiring soon	List with avatar ring, days-left badge, WhatsApp button
Empty state	Big "Add your first member" and a 3-step checklist
Banner	Subscription ending in 7 days or fewer

10.4 Member list and detail

- List: search, chips, cards with avatar ring, name, plan chip, expiry text, due tag, WhatsApp icon (if visible). Infinite scroll, pull to refresh, skeletons.
- Detail: large photo with gradient, progress ring of days left, plan card with count-up paid and due, segmented tabs (Attendance, Payments, Notes) with sliding indicator, action row: Collect, Renew, QR, WhatsApp, Edit. Delete only for Owner, with confirmation.
- Add member: 3-step form with progress bar, live expiry and totals.

10.5 Check-in

- Search at the top, results list, success banner (sage), warning banner (amber, already checked in), blocked or expired card (coral) with Renew now and Allow anyway.
- Header has a Scan button and today count. Scanner: full-screen camera with a rounded frame, torch toggle, overlay result for 1.5 seconds then resume.
- Success moment: pulse ring around the member photo, checkmark, success haptic.

10.6 Trainer screens

- My Members and Notes follow the same card style with masked phone and a lock icon.
- Notes: header "Notes", member chips with avatar or initials, weight chart (single point or empty state), type filter chips, floating Add Note button (one primary CTA only), notebook icon in the empty state.
- No payment, dues, address, birth date, Call or WhatsApp anywhere.

11. Role-based UI Differences

Element	OWNER	STAFF	TRAINER
Tabs	Home, Members, Check-in, Payments, More	Same as Owner	My Members, Check-in, Notes, Profile
Money cards on Home	Shown	Hidden	No Home
Phone number	Full, with Call and WhatsApp	Masked by default (lock icon)	Masked always (lock icon)
Address, birth date	Shown	Hidden	Hidden
Delete member, Reverse payment	Shown	Not shown	Not shown
More menu	Subscription, Staff, Trainers, Plans, Settings, Audit	Change password, Sign out	N/A (Profile tab)

Element	OWNER	STAFF	TRAINER
Gym code	Visible (copy, share)	Hidden	Hidden
Badge on More	Pending trainer count	-	-

12. Microcopy Guide

12.1 Tone rules

- Plain English, short sentences, no jargon or slang. No Hinglish in the UI (a Hindi translation will be added later through a strings file).
- Say what happened and what to do next. Never show "An unexpected error occurred" alone.
- Buttons start with a verb: Add member, Collect fee, Save, Approve.
- Use the rupee symbol and Indian number format (₹1,25,000).
- Dates: 07 Oct 2026. Time: 9:10 AM.

12.2 Key strings

Where	Text
Tagline	Manage your gym, all in one place
Login subtitle	Sign in to continue
Wrong credentials	Incorrect mobile number or password
Locked	Account locked. Try again in 15 minutes
Offline	Cannot connect to the server. Check your internet
Server error	Something went wrong on our side. Please try again
Duplicate mobile	This mobile number is already registered
Invalid code	Invalid gym code
Overpayment	Amount is more than the due
Empty members	No members yet. Add your first member
Empty trainer list	No members assigned yet. Your gym owner will assign members to you
Empty notes	No notes yet. Add the first note for <member name>
Empty trend	No collections yet this week (shown once)
Masked field tip	Hidden for privacy
Unassigned	This member is no longer assigned to you
Subscription warning	Your subscription ends in N days. Renew to keep using Gymholik
Subscription expired	Your subscription has expired. Your data is safe. Renew to continue
Forgot password	Please contact your gym owner to reset your password

13. Accessibility and Inclusivity

- WCAG AA contrast for all text (see section 2.2).
- Touch targets 44 x 44 or larger. 8 px minimum spacing between adjacent targets.
- Status is never colour only: pair colour with text or icon (Expired badge has the word, Due tag has the amount).
- Support system font scaling and Reduce Motion. Screen-reader labels on icon-only buttons (bell, scan, WhatsApp, eye toggle).
- One-handed use: primary actions in the lower half of the screen, centre check-in within thumb reach.
- Plan for Hindi: keep strings in one file, leave 30 percent extra width for labels, avoid text in images.

14. State Patterns

State	Pattern
Loading	Skeletons shaped like the final content. Pull-to-refresh spinner only for manual refresh
Empty	Icon, one friendly line, one primary action
Error	Icon, specific message, Retry. Field errors appear under the field
Offline	Thin coral bar at the top, disabled submit buttons, cached data still visible
Success	Toast for small actions, full-screen success for payment and check-in
Destructive	Confirmation sheet with the consequence in plain words and a coral confirm button
Permission denied	Explain why the permission is needed and offer Open settings

15. Current UI Defects to Fix (from simulator review)

#	Defect seen	Fix
1	Greeting overlaps status bar and Dynamic Island on Home	Safe-area top padding in shared Screen
2	Last Home card hidden behind tab bar	Bottom padding = inset + tab bar + 40
3	Seven tabs shown, Owner sees Notes and Profile	Single tabsByRole config, five tabs for Owner and Staff
4	Tab bar is translucent, card text shows through; labels tiny; centre button boxed	Solid #0B2B26 bar, 11 px labels, round raised centre button without label
5	Owner profile titled "Trainer Profile"; name differs between Home and More	Single user source from /me; no profile tab for Owner
6	Duplicate "No collections yet this week"	Show once
7	Duplicate Add Note buttons; empty circle in member chip; wrong empty icon; no header on Notes	One floating CTA, avatar or initials, notebook icon, header
8	Register still has City, no visible Owner or Trainer selector, button clipped	Remove City, add selector at top, fix scroll padding
9	Logo shows a checkerboard background	Use a real transparent PNG or SVG in mint
10	Blue iOS cursor on inputs	Set cursor and selection colour to sage
11	Bright photo behind the status bar and middle of Home	Darker overlay at top 0 to 120 px and below the hero
12	Gym name text too faint	Mint at 80 percent opacity
13	Bottom strip with a different background colour	Extend background under the home indicator

16. Handoff and Assets

Asset	Format and notes
Logo	SVG and transparent PNG, mint (#DAF1DE) for dark backgrounds, 1024 px square app icon on #051F20
App icon and splash	Icon 1024 x 1024 no transparency; splash background #051F20 with logo centred
Background image	bg-gym.webp (provided)
Fonts	Space Grotesk, Inter (Google Fonts via Expo)
Icons	Single outline family
Tokens file	colors, spacing, radius, typography, shadows as one theme module; no hard-coded colours in screens
Strings file	All user-facing text in one file
Figma (optional)	Create components from sections 6 and 9, then screens. Name frames with the screen inventory numbers from the App Flow document
